**Rough-Terrain Skiing Transporter****CONDITIONAL REQUEST FOR CONSTRUCTIVE ASSISTANCE**

Applicant has amended the specification and claims of this application so that they are proper, definite, and define novel structure, which is also unobvious. If, for any reason this application is not believed to be in full condition for allowance, Applicant respectfully requests the constructive assistance and suggestions of the Examiner pursuant to M.P.E.P §2173.02 and § 707.07(j) in order that the undersigned can place this application in allowance condition as soon as possible and without the need for further proceedings.

---

**ABSTRACT**

A Rough-Terrain Skiing transportation apparatus for mobilizing injured or disabled individuals and supplies/cargo. The Rough-Terrain Skiing Transporter made of lightweight steel alloy comprised of a Mainframe with a Seat, the Seat having a back rest, having one ski, and extended handles in the front and rear. The ski beneath the Seat is centered between the sides, and centered at the balance point between the front and rear. The Rough-Terrain Skiing Transporter has two Shock Absorbers attached at the rear and front of the Ski Support Structure for comfort during use. The Shock Absorbers are
